OBJECTIVE

Seeking an opportunity to utilize my technical, communication, and leadership skills to drive organizational growth. I am eager to contribute energy and dedication to a forward-thinking team while continually enriching my own technical knowledge.

SKILLS

Technical Skills: Java, Python, NumPy, Pandas, Matplotlib, AWS, Data Analytics, C++, JavaScript, React, Next.js, HTML5, CSS3, MySQL, REST APIs, GitHub

Behavioral Skills: Leadership, Team Collaboration, Problem Solving, Communication, Adaptability

EDUCATION

CGC University Mohali Master of Computer Applications (<i>CGPA: 7.69</i>)	2024 – 2026 Punjab, India
UTKARSH Academy Farrukhabad Bachelor of Computer Applications (<i>CGPA: 7.93</i>)	2021 – 2024 Uttar Pradesh, India
BJP Inter College Intermediate (<i>Percentage: 69%</i>)	2019 – 2021 Uttar Pradesh, India
BJP Inter College Secondary Education (<i>Percentage: 78%</i>)	2017 – 2019 Uttar Pradesh, India

PROJECTS

Face Recognition Attendance Management System | *Python, OpenCV, MySQL*

- Developed a secure and user-friendly system for automated attendance.
- Real-time **attendance** and **push data** implemented.

E-commerce website | *JSP, Java, MySQL*

- Product catalog dynamically loaded from the **MySQL database**.
- Enhanced **user experience** through clean **UI** and efficient navigation.

Virtual Voice Assistant | *ReactJS, NodeJS, MongoDB, Gemini API*

- Applied NLP techniques for speech recognition and command execution.
- Ensured **secure authentication** and **backend data handling**.

SnapCart: Grocery Delivery | *NextJS, MongoDB, REST APIs*

- Applied secure authentication and authorization using **JWT**, **OAuth**, and **role-based** access control.
- Integrated **real-time order tracking**.

Movie Recommendation System | *Python, Pandas, Collaborative Filtering*

- Enhanced a recommendation engine using **content-based** and **collaborative filtering** techniques.
- Implemented cosine similarity to suggest movies based on user preferences.
- Processed and analyzed large datasets to improve the accuracy of the recommendation.

Spam Message Detection System | *Python, Machine Learning, Scikit-learn*

- Built a machine learning model to classify SMS messages as **spam** or **ham** using **Naïve Bayes** and **TF-IDF vectorization**.
- Performed data preprocessing including text cleaning, tokenization, and stop-word removal.
- Achieved high accuracy through model tuning and cross-validation.

Publication/Research/Review Paper

Custom Gift and Merchandise | *Mentor Mr. Kamal Thakur*

- Market research and Trend Analysis.
- Business Strategy and branding.
